

| Automated Carrier Auditing & Claims

We recover the shipping money carriers **don't want you to know about.**

By automating the claims process for all shipping exceptions, we ensure you are fully reimbursed for the cost of your goods and the shipping label.

Start Your Free Audit

No upfront fees. No risk.

Who We Are

We find the shipping savings carriers hide from you — with no upfront fees and no risk to start.

Built and run by people who have worked inside the claims departments at the major couriers. We don't guess how to get a claim approved — we know, because we used to approve and deny them.

ShipZen offers a cleaner path to recovering money across your entire fulfillment operation.

**We don't guess how to
get a claim approved.
We know, because we
used to be the ones
denying them.**

THE INSIDER ADVANTAGE

The Carrier Playbook

Built by former claims department insiders from major couriers. We know exactly what they hide and how to expose it.

Zero Risk, Zero Upfront Fees

We completely automate your refunds and only take a cut of the money we successfully put back in your pocket.

Total Operation Recovery

A cleaner, hands-off path to recovering lost capital across your entire fulfillment operation.

Why In-House Claims Fail

Hidden Rules

Carriers won't automatically refund you. You must actively find and prove their mistakes.

Strict Deadlines

Every claim type has a tight expiration window. If you miss the deadline, the money is gone.

Insider Rules

Each carrier has complex, unwritten proof requirements. Without them, claims are denied.

High Costs

In-house filing requires dedicated staff, making it expensive, slow, and highly error-prone.

| Comprehensive Recovery

Most providers only chase late or lost-in-transit shipments. We go further and recover across every category. More categories covered means more of your money recovered.

The AI & Human Advantage

Most competitors run on AI or automation alone. It's fast, but it misses nuance and leaves money on the table. ShipZen runs a powerful two-layer system:

Layer 1: Automation

Our proprietary software catches every eligible shipping exception in real time, auditing at absolute scale with zero fatigue.

Layer 2: Human Experts

Former carrier reps review filings, catch errors AI misses, and manually build the strongest possible case for approval.

Our Win Rate

73%

Overall Win Rate

Across all claim types we file.

84%

Delayed & Lost

Our strongest recovery category.

Results Driven by Process

That high success rate is a direct result of our two-layer process: insider knowledge of what each carrier approves, paired with automation that never misses an eligible claim.

We recover the total cost impact for your business — not just the original shipping label cost, but the actual product value as well.

Late-Shipment Automation

Missed Commitments = Full Refunds

Guaranteed Services

Applies to time-definite services like UPS Next Day Air, FedEx Overnight, and USPS Priority Express.

The Minute Rule

If a carrier misses the exact commitment time—even by a single minute—you are entitled to a full refund.

Hands-Free Recovery

Our software tracks every package in real time, automatically flags missed guarantees, and files claims for you.

Seamless Integration Roadmap

Integrating ShipZen requires absolutely zero heavy lifting from your IT or operations teams. We handle the complexity so you can focus on shipping.

Fast, Secure Setup

Syncs directly with your existing carrier accounts securely and in mere seconds via API. No coding required.

Zero Disruption

There are absolutely no changes to your carriers, dedicated reps, negotiated rates, or daily internal fulfillment workflows.

Fully Hands-Off

The engine runs quietly in the background—auditing, flagging, and filing claims automatically while you sleep.

Success-Based Pricing

Completely hands-off, and absolutely no risk: **no upfront fees, no subscriptions.**

No Risk

If we don't recover anything for you, you pay nothing. It's that simple.

50/50 Revenue Split

You receive 50% of every refund we recover — money you'd otherwise never have seen — paid out hands-free.

Simple Invoicing

We simply invoice for the other 50% at the end of the month as our fee.

Our incentive is perfectly aligned with yours: **we only make money when we successfully put money back in your pocket.**

What Recovery Looks Like for You

Automated Credits

Recovered funds are credited directly back to your accounts. No manual administration, and no chasing down carriers.

Total Visibility

Access a clear, ongoing, and transparent reporting view of exactly what we've recovered and where it originated from.

Bottom Line Impact

We retrieve the money that was already rightfully yours, putting it safely and securely back onto your bottom line.

Our incentive is perfectly aligned with yours: **we only make money when we successfully put money back in your pocket.**

| Your Shipping Profile

To build your custom recovery model, we start with a few discovery details.

Operational Setup

Carrier Mix

Which carriers do you currently use? (UPS, FedEx, DHL, USPS, etc.)

Total Volume

How many total packages do you ship per month across all carriers?

Service & Pain Points

Service Breakdown

Which specific services, and roughly what percentage of monthly volume for each?

Where it hurts most

Which problems are hitting hardest right now? (Delayed, lost, RTS, damaged)

Let's find your **hidden** refunds.

ShipZen

Your carriers are holding money that belongs to you — and they're counting on you not to ask for it.

ShipZen recovers it with **insider expertise**, a **73% win rate**, and **zero risk**.

All we need to get started is a quick look at your shipping volume and carriers. [Where should we send the details?](#)

Case Study

E-Commerce Impact Analysis

A look at a recent high-volume e-commerce client demonstrates that winning higher-value claims and recovering original shipping fees acts as a massive financial multiplier.

75.4%

Dollar Recovery Rate

We successfully secure wins on higher-value claims, driving up the actual capital returned well past the raw win rate.

95.8%

In-Transit Success

Our core driver. We achieved an extraordinary dollar recovery rate for items lost or stuck within the carrier network.

+21.5%

Shipping Multiplier

Refunded shipping costs added a 21.5% bonus strictly in recovered label fees on top of the product cost recovery.

The Stabilization Effect: In-house teams often drop the ball during peak-volume months. Our dedicated service prevents claim fatigue and ensures no money expires unfilled.
